-82.0°C

Ultra Low Freezers

B Medical Systems | U Range

Ultra Low Freezers are devices intended for the storage of blood components and blood plasma, human cells, tissues and other laboratory samples at ultra low temperatures down to -86°C.

Compliant to DIN 58375 | Medical Device Class IIa according to MDD 93/42/EEC

LINE

●	B Medical Systems Electronics
●	B Medical Systems 7'' full touchscreen display
●	Power indicator light and digital temperature indicator (display: 0.1 digits)
●	Controlled fan cooling system for constant temperature and even temperature distribution across the entire refrigerating chamber
●	Automatic switch-off of the evaporator fans when the door opens
●	Self-contained alarm system with integrated battery takes over the alarm function and temperature value measurements in case of system failure for at least 48 hours
●	Acoustic and visual alarm signal in case of temperature alarm and system failure
●	The alarm history function on the electronic stores all the relevant values during a temperature alarm, such as: min., max., average temperature and alarm duration
●	Remote transmission alarm signal (via potential-free contact) in case of temperature alarm (change-over contact)
●	Door opening alarm (visual / acoustic)
●	Designed and tested for climatic class SN (ambient temperature range +10°C to +32°C)
●	Interior made from stainless steel
●	Additional remote transmission alarm signal (via potential-free contact) in case of system failure (change-over contact)
●	Smooth castors for optimum flexibility of movement
○	External water cooling
○	Ambient temperature sensor
●	°B Connected - Universal software for the monitoring of refrigeration devices, including the acquisition, recording and visualization of temperature data
●	Ethernet interface for the visualization of all operating and control functions (hardware and software settings) via °B Connected monitoring software on a peripheral device (computer)

Ultra Low Freezers

B Medical Systems | U Range

4 models • Volume **451 > 895 L** • Set temperature **-82°C** • Climate class **SN** • Compliant to **DIN 58375** I **MDD 93/42/EEC, Class IIa**

In conformity with national and international guidelines, regulations for Medical Devices offering reliability, efficiency and safety at an optimal price.

MODELS U401-501-701-901 | **PREMIUM LINE**

○ Exclusive integrated electronics handle bar *(Patent pending)*

All functionalities are easily accessible:

• Digital control with full functionalities - New B Medical Systems 7'' full touchscreen display integrated at optimal level in the door handle with pre-installed connection allowing exclusive °B Connected monitoring functionalities

• Open/close - Heavy duty door lock mechanism

○ High quality materials

New high quality coating, certified medical devices quality and antibacterial, high quality steel for better longevity and easy hygiene control.
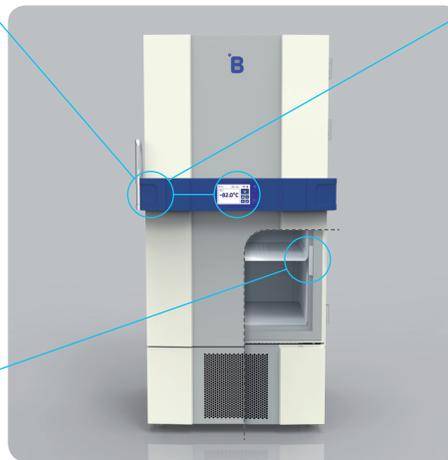

○ Special features

• Integrated pressure release valve in the door permitting faster opening in one move, and offering easy access for cleaning

• Insulated inner doors for significantly lower loss of cooling when open

• Full compatibility of inner modules and rails, no need to buy new racks, you can keep racks previously used in different models

○ Versatile modularity

Excellent storage capacity and modularity - Large choice of racks offering modularity for every need.

Ultra Low Freezers are devices intended for the storage of blood components and blood plasma, human cells, tissues and other laboratory samples at ultra low temperatures down to -86°C. U models reflect the highest and most uncompromising requirements with state-of-the-art technology and economy. The cooling system is optimally designed with respect to energy consumption as well as to the development of waste heat and noise. Standard factory setpoint is -82°C, temperature is adjustable from -40°C to -86°C.

INTEGRATED PRESSURE RELEASE VALVE

This aluminium die cast handle offers a strong and ergonomic feeling that allows the user to open the door with one hand. Inside the freezers, the vacuum will be automatically removed through a release valve, located in the door, in order to allow easy cleaning.

The handle is equipped with an electric lock that can be deactivated through the user interface.

Full functionalities at a glance

B Medical Systems | Electronics

PREMIUM LINE | Multi-function electronics with 7'' full touchscreen display, integrated at optimal level in the door handle with pre-installed connection allowing exclusive °B Connected monitoring functionalities.

Power switch OFF / ON

• To switch on press the ON/OFF button for 1 second. The green LED will light up

• Switch off protected by password. The door will automatically unlock before powering down

Touchscreen 7'' full display

During normal operation the display shows:

• At the top: current voltage, current time, gasket heater and login status (user level)

• Left-hand side: temperature of the regulation sensor (displaying this temperature can be disabled through the settings) and internal temperature displayed in °C (Celsius) or °F (Fahrenheit) in increments of 0.1°

• Right-hand side: touch buttons to access door unlock, clean, menu, alarm mute and message functions

USB-port & SD-card-slot

Acoustic and visual alarm signal

When an alarm occurs, the red alarm LED lights up and an acoustic signal sounds. The corresponding alarm message appears on the display together with the measured inside temperature. If several alarms occur simultaneously, the messages will be shown alternately.

Keycard reader

Login / Unlock using a NFC card

Touch buttons

• DOOR UNLOCK button: unlocks the door of the device

• CLEAN button: the cleaning button allows the user to disable the touch capability of the screen for a short period of time in order to clean the screen. This button is replaced by the logout button when any user is logged in

• MENU button: allows access to the menu screen

• ALARM MUTE button: deactivates the acoustic alarm for a predefined period of time

• MESSAGE button: during a warning or alarm situation, the color of this button and the corresponding level will change. Information on an active alarm and warning is accessible by pressing the message button

SAVING LIVES THROUGH RELIABLE AND INNOVATIVE TECHNOLOGY

Optimum control and protection

B Medical Systems | °B Connected

°B CONNECTED | MONITORING SOFTWARE

Universal software for the monitoring of refrigeration devices, including the acquisition, recording and visualization of temperature data.

- Unique monitoring software for the full range of Blood Management Solutions and Medical Refrigeration products
- Web-based interfaces for computers and mobile devices
- Modern design for simple and intuitive use
- Graphic display of temperature curves
- Integrated event and activity history of appliances' components
- Data recording on centralized database for long-term archiving
- Easy setting of specific alarm forwarding, via email or SMS
- Generation of reports compiling crucial data and activities
- Temperature and detailed device data export for third-party software
- Important price advantage compared to a traditional circular chart recorder and its spare parts
- REST API to access raw data directly from the database in read only mode

KEY BENEFITS:

- Unique interface for the monitoring of the full range of refrigeration devices
- Centralized database providing data access to entire customer network
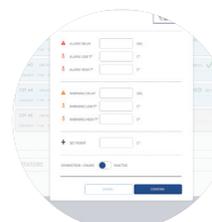

---

❶ CONFIGURATION

USER MANAGEMENT
- Password login
- Access right

DEVICE SETTINGS
- Device information
- Device & user configuration

ALARM PROFILE
- Parameters of the alarm profile (day, hour, minute)
- Alarm management

---

❷ DISPLAYING

DETAILED DISPLAY
- Optimised design for mobile and touch compatible devices
- Support of multiple languages
- Real time data: Current temperatures, set point, upper and lower limit, door state, compressor runtime
- Log data: Events, alarms within date/time, event type, description of the event. Event and alarm confirmation function
- Batch management: Read in of plasma bags with a barcode scanner
- Movement state and door control of Agitator devices
- Parameter settings of each device: Factory settings, real time clock, language, firmware version, RS485 address, IP address
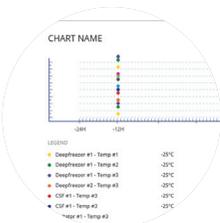

°B Connected offer a highly flexible system that is adaptable to specific customer requirements
> Complete & legally safe documentation of temperature data
> Comprehensive applications and diagnostic possibilities

❸ ANALYSING
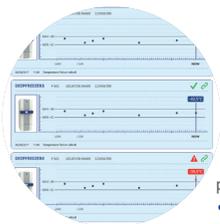

REAL TIME GRAPHICS

- Graphic temperature progress (in real time)
- Adjustable time axis
- Offline navigation

INTERACTIVE ANALYSIS

- No limitation in terms of time range
- Freely scalable
- Detailed information for any point of time
- Temperature data, events and alarms
- Login history and audit trails

CONTROL CENTER

Overview (Control Monitor) of all monitored appliances:
- Information regarding status, appliance name, location, connection, upper and lower limit, current temperature, events / alarms
- Dashboard to combine several temperature measurements in one single graph

PRINTED ANALYSIS

- Customisable print reports on daily, weekly and monthly basis
- Exports in various file types
- Standardised format

After Sales support and service

We strive to provide you with the highest standards of service; not only through our selected distributors and partners for all your maintenance and service but also our second line trouble shooting and after sales service. This Factory based group of engineers is there to help our partners and yourself to get the best solution for your cold storage needs.

B medical systems

SAVING LIVES THROUGH RELIABLE AND INNOVATIVE TECHNOLOGY

B Medical Systems (formerly Dometic Medical Systems) has more than 35 years' experience in the medical refrigeration sector.

The company, formerly known as Electrolux Medical Systems, was founded in 1979 when the World Health Organization approached Electrolux in Vianden, Luxembourg, to create a solution for the safe storage and transport of vaccines around the world. In 2001, Electrolux Medical Systems became part of the Dometic Group, and was renamed Dometic Medical Systems. Having established a legitimate reputation in the medical equipment industry, the company has also become a global leader in vaccine cold chain.
